1. PROJECT OVERVIEW

1.1 Introduction

This document provides complete documentation for the **Koenigsegg Automotive AB Informative Website**. The website was developed as a static, multi-page informational platform showcasing the brand's heritage, hypercar models, technological innovations, world records, and providing a contact mechanism for prospective clients and media.

1.2 Project Objective

The primary objective of this website is to serve as an authoritative digital showcase that educates visitors about Koenigsegg's heritage, engineering philosophy, current hypercar lineup, and corporate identity.

The website is informational in nature and designed to inspire and engage:

- Car enthusiasts
- Potential clients
- Automotive journalists worldwide

1.3 Core Business Goals

The website aims to:

- Establish and reinforce Koenigsegg's global reputation as a leader in automotive engineering
- Enable visitors to explore the full range of Koenigsegg models through rich media content
- Communicate the brand's unique origin story, core values, and milestone achievements
- Provide a contact and enquiry form for prospective clients and media professionals
- Showcase engineering specifications and technology breakthroughs
- Create a professionally hosted, publicly accessible digital presence

2. WEBSITE STRUCTURE

2.1 Page Inventory

page	Filename	Purpose
Home	Index.html	Landing page with hero banner, statistics, featured models, timeline, and technology teaser
About	About.html	Company history, founder story, mission statements, and core values
Models	Models.html	Grid overview of all current Koenigsegg hypercars
Model details	Model-details.html	Detailed specifications and media for individual models
Technology	Technology.html	Engineering innovations and technologies
Records	Records.html	World records and performance milestones
Gallery	Gallery.html	High-resolution photo gallery
contact	Contact.html	Enquiry form with validation and social media links

2.2 File Organization

```
project-root/
├── index.html
├── about.html
├── models.html
├── model-detail.html
├── technology.html
├── records.html
├── gallery.html
├── contact.html
├── css/
│   └── style.css
├── js/
│   └── main.js
├── images/
│   └── (image assets)
└── README.md
```

2.3 Navigation Structure

Primary Navigation

- Home → index.html
- About → about.html
- Models → models.html
- Technology → technology.html
- Records → records.html
- Gallery → gallery.html
- Contact → contact.html

Secondary Navigation

- Site logo links back to homepage
- Footer contains quick links
- Social media icons open in new tabs

2.4 Three-Click Rule Compliance

All content on the website is reachable within three clicks from the homepage.

Example

1. Navigate to Models page
2. Select a model card
3. View detailed specifications

The contact form is accessible in one click from any page.

3. DESIGN SPECIFICATIONS

3.1 Color Palette

Color Name	Hex Code	Usage
Dark Background	#0A0A0A	Primary background
Charcoal	#1A1A1A	Secondary sections

Koenigsegg Red	#C8102E	Buttons and accents
Red Hover	#A00D26	Hover effects
Light Text	#F5F5F5	Main text
Gray Mid	#2C2C2C	Borders and card

3.2 Typography

font	usage	Weights
Montserrat	Headings, navigation, buttons	400, 500, 600, 700, 800
Open Sans	Body text and paragraphs	300, 400, 600

3.3 Design Philosophy

The website follows a dark, minimalistic luxury aesthetic inspired by the Koenigsegg brand identity.

Key Principles

- Dark premium backgrounds
- Strategic red highlights
- Spacious layouts
- Card-based sections
- Responsive design

3.4 Layout Structure

Each page follows a consistent structure:

1. Fixed Navigation Bar
2. Page Header
3. Main Content Area
4. Footer

4. TECHNICAL SPECIFICATIONS

4.1 Core Technologies

Technology	version	purpose
HTML5	5.3	Semantic structure
CSS3	Level 3	Styling and responsiveness
Bootstrap	5.3	Grid system and UI components
JavaScript	ES2022	Interactivity and validation
Font Awesome	6.x	Icons
Google Fonts	Web API	Typography

4.2 Development Tools

- Visual Studio Code
- Git & GitHub
- GitHub Pages
- Chrome DevTools

4.3 Browser Support

The website supports:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge
- Safari
- Opera

4.4 Responsive Breakpoints

Device	Screen Width	Layout Behavior
Mobile	<576px	Single-column layout
Tablet	576-768px	Two-column layout
Desktop	768px-1200px	Multi-column grids
Wide Screens	>1200px	Expanded layouts

5. PAGE-BY-PAGE DOCUMENTATION

5.1 Home Page (index.html)

Purpose

Landing page and central hub of the website.

Content Sections

- Hero Section
- Statistics Bar
- Featured Models Carousel
- Heritage Timeline
- Technology Teaser
- Footer

Beyond Boundaries

Form Behavior

- HTML5 validation
- Success message display
- Form reset after submission
- Client-side demo processing

6. STYLING DOCUMENTATION (style.css)

6.1 Global Styles

Defines:

- CSS variables
- Typography
- Layout spacing
- Background styling

6.2 Navigation Styling

Features:

- Sticky navbar
- Blur effects
- Hover animations
- Scroll transitions

6.3 Component Classes

class	Purpose
.btn-primary-red	Main red button
.btn-outline-red	Outline button
.car-card	Vehicle card
.spec-badge	Specification tags
.section-title	Styled heading
.status-bar	Statistics section
.timeline-item	Timeline entries
.value-card	Value cards
.page-header	Banner header

6.4 Responsive Design Rules

Media queries optimize:

- Font sizes

- Layout spacing
- Grid stacking
- Mobile usability

7. JAVASCRIPT DOCUMENTATION (main.js)

7.1 Functions and Purpose

Function	Description
Active Navigation Highlight	Highlights current page
Smooth Scrolling	Smooth anchor navigation
Sticky Navbar	Navbar scroll effects
Form Validation Handler	Validates contact form
Dynamic Model Loading	Loads model content dynamically

7.2 Event Listeners

- DOMContentLoaded
- scroll
- submit
- click

8. HOSTING AND DEPLOYMENT

8.1 Hosting Platform

The website is hosted using **GitHub Pages**.

Advantages

- Free hosting
- HTTPS support
- Easy deployment
- Custom domains

8.2 Deployment Process

1. Push files to GitHub repository
2. Enable GitHub Pages
3. Select main branch
4. Publish website

Live Deployment Link

Website URL: <https://tarrensting.github.io/Tarren1401cse25-337/>

8.3 Repository Structure

- HTML files in root directory
- CSS in /css
- JavaScript in /js
- Images in /images

9. QUALITY ASSURANCE

9.1 Testing Performed

Browser Testing

- Chrome
- Firefox
- Edge
- Safari

Responsive Testing

- Mobile devices
- Tablets
- Desktop screens

Functionality Testing

- Navigation links
- Form validation

- Dynamic content loading
- External links

9.2 Validation Status

- HTML5 validated using W3C Validator
- CSS validated using W3C CSS Validator
- No JavaScript console errors

9.3 Performance Considerations

- CDN-based libraries
- Optimized images
- External CSS and JavaScript files
- Reduced render-blocking resources

10. FUTURE DEVELOPMENT RECOMMENDATIONS

10.1 Short-Term (3–6 Months)

- Lazy loading images
- WebP conversion
- Accessibility improvements
- Structured data
- Cookie consent banner

10.2 Medium-Term (6–12 Months)

- Headless CMS integration
- 3D model viewer
- Video backgrounds
- Multi-language support

10.3 Long-Term (12+ Months)

- VIP client portal
- Progressive Web App
- AI chatbot integration
- Google Analytics dashboard

11. CONCLUSION

The Koenigsegg informative website successfully delivers a professional and visually compelling digital presence for one of the world's most exclusive automotive brands.

Successfully Implemented Features

- Responsive multi-page design
- Dynamic model specifications
- HTML5 validated forms
- Premium dark luxury branding
- Three-click navigation structure
